

Nadim Attar

.NET BACKEND DEVELOPER

About Me

Over 4 years of professional experience working with Microsoft technologies such as C#, ASP.NET MVC/CORE, WEB API, ADO.NET/Entity Framework, MS SQL Server, and IIS. Proficient in Database design and writing stored procedures, Functions, Statements, Triggers, Views, and performing Query Optimization. Hands-on experience in projects following SOLID principle, Lazy Loading, Factory, and Dependency Injection Design Patterns.

Professional Experience

CANADA HITECH | WEB & MOBILE DEVELOPER

2022 – Present

Key responsibilities:

- Built over 3 E-commerce websites and integrated payment gateways like N-G, MYFATOORAH, and HYPERPAY.
- Worked with Agile methodology to ensure smooth collaboration within self-organizing, cross-functional teams.
- Developed business logic and data tier components extensively using C#, ASP.NET MVC, and Entity Framework.
- Implemented CRUD functionality and sorting, filtering, and pagination in MVC with Entity Framework.
- Deployed REST web services and ASP.NET Web APIs, and performed pre-testing using POSTMAN, INSOMNIA, SWAGGER.
- Implemented AJAX controls for partial page updates and improved page response time.
- Implemented JWT security to provide authentication and authorization, securing the Web API.

CRAFT CODE | WEB DEVELOPER

2021 – 2022

Key responsibilities:

- Participated in the complete SDLC, including Analysis, Design, Implementation, Testing, and Maintenance, using Agile Methodology.
- Implemented convention-based CRUD actions such as GET, POST, PUT, and DELETE.
- Developed the web application's front-end using React.js and Material-UI.
- Prepared LINQ Query operations, such as Grouping, Ordering, and Filtering, to access the database for searching.
- Performed Testing, Debugging, Tracing for errors, Documentation, and maintenance of the application.
- Used Unit Testing & Integration Testing to simulate different scenarios and detect potential bugs.
- Created Stored Procedures for data retrieval and generated various reports using SQL Reporting Service (SSRS).
- Responsible for writing SQL queries based on complex business logic.
- Designed new .NET Core architectures using clean code techniques for more than 6 projects, resulting in a 75% increase in productivity.
- Applying distributed caching with Redis.
