Skills

- C#
- ASP.Net Core
- ASP.NET Web API
- Entity Framework
- .NET Framework
- ASP.NET MVC
- ASP.NET
- REST APIs
- SQL
- Xamarin
- React.js
- Next.js
- Angular.js
- JQuery
- HTML
- Bootstrap
- Material UI
- DevExpress

MY Education

INFORMATICS ENGINEERING
BACHELOR OF ENGINEERING

ALEPPO UNIVERSITY

Graduated with a very good grade, 2016-2022

About Me

Seasoned backend developer with a rich 5-year background in Microsoft technologies. Proven track record in designing and implementing scalable solutions. Adept at optimizing database performance through efficient query and stored procedure development. Committed to delivering high-quality software and collaborating effectively in cross-functional teams. Excited about leveraging expertise to contribute to dynamic projects and drive innovation in backend development.

Professional Experience

CANADA HITECH | FULL STACK DEVELOPER

2022 – Present

Key responsibilities:

- Built over 3 E-commerce website in Asp.net Mvc and two applications using Xamarin.
- Integration with multiple Payment gateways such as: Myfatoorah, N-Genius, Hyperpay, Tabby.
- Implemented Agile methodology to cultivate seamless collaboration within cross-functional teams, fostering adaptability and achieving successful project outcomes through efficient teamwork and continuous improvement.
- Skillfully developed business logic and data-tier components using C#, ASP.NET MVC, ADO.NET, and Entity Framework, showcasing technical expertise and contributing to project success.
- Successfully deployed REST web services and ASP.NET Web APIs, ensuring optimal performance through meticulous pre-testing with tools such as POSTMAN, INSOMNIA, and SWAGGER.
- Successfully implemented OneSignal for push notifications in both Xamarin mobile apps and web platforms, significantly improving user engagement and communication effectiveness.
- Implemented JWT security with refresh token support to provide robust authentication and authorization, enhancing the security of the Web API.

Languages

- **Arabic (Native)**

- Effectively utilized SMTP (Simple Mail Transfer Protocol) to seamlessly enable email communication within web applications, enhancing user engagement and communication channels.
- Showcasing proficiency in system analysis, I leverage a robust skill set with SQL Server to expertly design and implement efficient database structures, establish relationships, and develop optimized stored procedures. Additionally, I excel in crafting intricate queries to extract valuable insights, supporting precision in data-driven decision-making.
- Proficiently utilize and manage CMS systems, ensuring effective content management and operational efficiency.
- Proficient in developing and working with Windows applications.
- Implemented robust error handling strategies, ensuring effective management and swift resolution within systems. This proactive approach enhanced system reliability and operational efficiency.
- Implemented NLog, a versatile logging platform for .NET, contributing to enhanced system monitoring and performance optimization.

CRAFT CODE | WEB DEVELOPER

2021 – 2022

Key responsibilities:

- Proficiently in Git version control for streamlined collaboration and code management. Expertly utilized Git to ensure efficient development workflows and code repository maintenance.
- Collaborated on the implementation of AJAX controls to enhance partial page updates, significantly improving overall page responsiveness and enriching the user experience.
- Contributed with the full Software Development Life Cycle (SDLC), encompassing Analysis, Design, Implementation, Testing, and Maintenance phases, while adhering to Agile Methodology practices.
- Executed CRUD functionalities, encompassing fundamental HTTP actions including GET, POST, PUT, and DELETE.
- Implemented the user interface of a web application by utilizing React.js, Angular.js, Bootstrap, and Material-UI.
- Expertise in Entity Framework with LINQ, adeptly designing queries and executing insert/update operations for optimized data handling within applications.
- Solid background in Unit Testing and Integration Testing for web applications, ensuring reliability and robustness. My testing expertise enhances the development of high-quality web solutions.
- Applied clean architecture methodology to design modern .NET Core architectures across multiple projects, leading to a remarkable 80% increase in productivity. This approach significantly enhanced project efficiency and overall outcomes.
- Proficient in implementing Redis for distributed caching, enhancing system performance and reducing response times.
